PROFILE

Aspiring Full Stack PHP Developer with a strong foundation in programming fundamentals and a keen interest in building robust and scalable web applications. Possessing a solid grasp of PHP, HTML, CSS, and JavaScript, I am eager to contribute my skills to a dynamic development team. Highly motivated to learn new technologies and rapidly adapt to evolving industry trends. Seeking a challenging role to apply academic knowledge and gain practical experience in the field of web development.

SKILLS

- **Frontend Web Technologies** – HTML5, CSS3, JavaScript, React.js
- **Frontend UI Libraries** – Tailwind CSS, Bootstrap,
- **Backend Technologies** – Rest API, Node.js
- **Database** – MySQL, Oracle SQL
- **IDE/ Tools** – Visual Studio Code, Git/GitHub

PROJECTS

USERHUB

[GITHUB](#) [LINK](#)

- Developed "UserHub," a dynamic web application using HTML, CSS, Bootstrap, and PHP.
- Focused on an intuitive user interface with responsive design.
- Leveraged Bootstrap for modern, mobile-friendly layouts.
- Utilized PHP for efficient server-side operations.
- Enabled user account management and interaction with various features.

IMAGE EDITOR

[GITHUB](#) [LINK](#)

- Developed an image editing application using HTML, CSS, and JavaScript.
- Implemented filters: brightness, saturation, inversion, grayscale.
- Integrated functionalities: image rotation, flipping.
- Added a download feature for saving edited images.
- Designed an intuitive, user-friendly interface.

PASSWORD GENERATOR

[GITHUB](#) [LINK](#)

- Developed a password generation application using HTML, CSS, and JavaScript.
- Implemented customization options: uppercase letters, special characters.
- Designed an intuitive interface with toggles for customization.
- Generated four unique, secure passwords based on user criteria.
